LocalizeZone
Built for every market.

COMPANY PROFILE

Language connects. Opportunity grows.

TRANSLATION & LOCALIZATION FOR BUSINESS

The right message. The right context. Ready for your market.

Documents / Websites / Software / Multimedia

Helping businesses communicate clearly across markets.

LocalizeZone provides translation and localization for documents, websites, software, apps and multimedia. Each project starts with the intended use, audience and delivery requirements to establish an appropriate approach.

OUR APPROACH

Preserve meaning.
Sound natural.
Support delivery.

Language should support your business goals.

Beyond translating individual sentences, content should preserve your brand voice, terminology and connection to the product, process or user experience.

01

Clear requirements

Agree the scope at the outset.

02

Relevant context

Shape content for its audience.

03

Practical handoff

Use formats your team can work with.

Relevant expertise.
Content checked in context.

Services are scoped around the document type and intended use.

01

Specialist translation

Company documents, reports, commercial content and subject-specific material. Align terminology, audience and writing style before work begins.

02

Technical translation

Operating manuals, specifications, catalogues and manufacturing documents. Focus on figures, units, instruction sequences and cross-references.

03

Certified translation

Assess the documents, language pair and intended use to confirm translation scope and relevant procedures. Receiving requirements are clarified for each case.

04

Translation review

Compare an existing translation with the source and review meaning, terminology, style and consistency within the agreed scope.

Reference formats: DOCX, XLSX, PPTX, PDF and editable source files.

Consistent experiences. Accessible content.

01 Website localization

Brand pages, products, navigation, forms and help content, with delivery mapped to page URLs or CMS fields.

02 Software & app localization

Interface strings, messages and help content, accounting for variables, character limits and screen context.

03 Video translation

Training, product and communication videos, with script, translation and production requirements agreed in advance.

04 Subtitling

Translate and prepare subtitles to meet agreed timing, length, readability and delivery-format requirements.

05 Remote interpreting

Support online discussions for an agreed language pair, subject and schedule, with materials prepared before the session.

From the initial brief to a practical handoff.

01

Receive & clarify

Identify the material, languages, audience, source version and required deadline.

02

Agree scope & quotation

Confirm volume, work items, formats, schedule and delivery arrangements.

03

Translate & localize

Work from approved references, brand voice and agreed terminology.

04

Review in context

Check meaning, terminology, figures and any points requiring client confirmation.

05

Deliver & discuss

Deliver files in the agreed structure, with implementation notes or outstanding questions.

Quotes and delivery schedules are confirmed after reviewing the actual content.

Professional care in every detail.

01 Understand the context

Shape content for the market, audience, subject area and publication channel.

02 Consistent terminology

Use approved glossaries and references to keep product names, concepts and wording consistent.

03 Implementation-ready files

Agree file structures, formats and supporting notes so your team can use the deliverables.

04 Transparent scope

Clarify translation, review, formatting and implementation work before starting.

05 Clear coordination

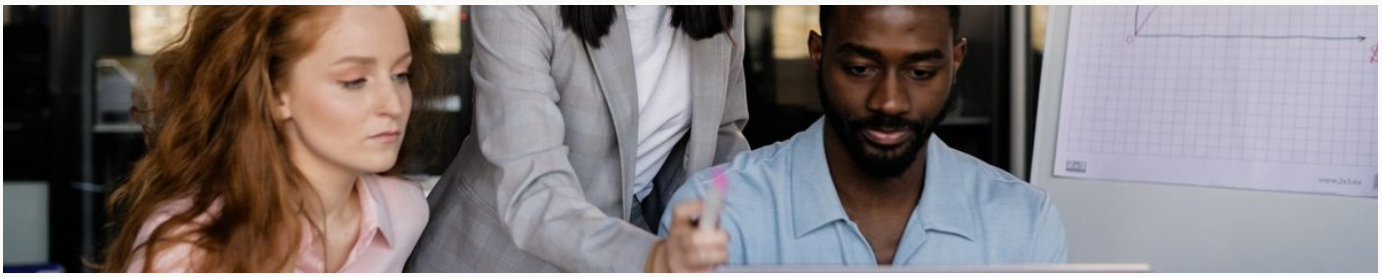

Record source queries, version changes and points requiring client confirmation.

06 Discuss confidentiality

Agree transfer methods, access, retention and any NDA required for the project.

Built for different teams. Focused on practical needs.

Client segments and collaboration needs aligned with LocalizeZone's services.

01 **Technology & digital products**

Websites, software, apps and help content requiring consistency across markets.

02 **Manufacturing & engineering**

Product specifications, operating manuals and catalogues that need clarity and traceability.

03 **Commerce & exports**

Company, product and transaction content adapted for international partners and customers.

04 **Training & communications**

Videos, subtitles and training material that convey the message to the intended audience.

What to look for in a language partner.

Clear scope and quotations • Consistent terminology • Agreed delivery formats • Documented feedback and clarification.

What language does your next project need?

Share content. Find the right approach.

To prepare a quotation, share your files or links, language pair, intended use and preferred deadline. We will review the content to confirm scope, timing and delivery formats.
